Making connections

Creating 'cohort-building' collaborative spaces and social areas will enhance the student learning experience - complementing classroom teaching and helping build a strong sense of community.

An expanded 'hackspace' with access to shared hardware, and smaller zoned areas will create spaces for:

- Group discussions
- Group project meetings
- Tutorials conducted by post-docs
- Private group working such as small revision groups
- Hardware-intensive individual project work
- Student-led projects and societies

Cloud Campus students

Studying in Deakin's Cloud Campus means you're in control of your learning. You choose when and where to study with online classes and seminars accessed through your unit sites. You can connect with your teaching team and other students through discussion forums and be a part of Deakin's fastest growing campus. There's also an abundance of support services and resources available to keep you motivated and on-track. When you study in the Cloud Campus, the sky is the limit.
